Board Policy

The Public Schools in response to Maryland Education Bylaw 13A.04.18.01 has established a Garrett County School Health Advisory Committee for the purposes of:

1. Consulting with the professional educators in developing, implementing, and evaluating the school programs in the area of family life education within the program of Comprehensive Health Education, and;

2. Promoting cooperation among the school system, the health agencies, and the community in providing family life education programs.

The committee is advisory in nature; the legal responsibility for the local school health programs and the materials used remain with the Public Schools and its administrative staff.
