

# Garrett County School Planning Committee

Redistricting Scenario Testing

August 30, 2019

# Update

- Two scenarios explored.
  - Scenario 1 moves students only from Broad Ford to Accident or Grantsville.
  - Scenario 2 includes the Scenario 1 moves, but also moves students from Crellin and Yough Glades to Broad Ford, and from Accident to Grantsville
- Goal is to balance elementary capacity
  - Maps show elementary schools only
  - Tables document moves at all levels.
- Planning areas (potential moves) are shown to explore concept only.

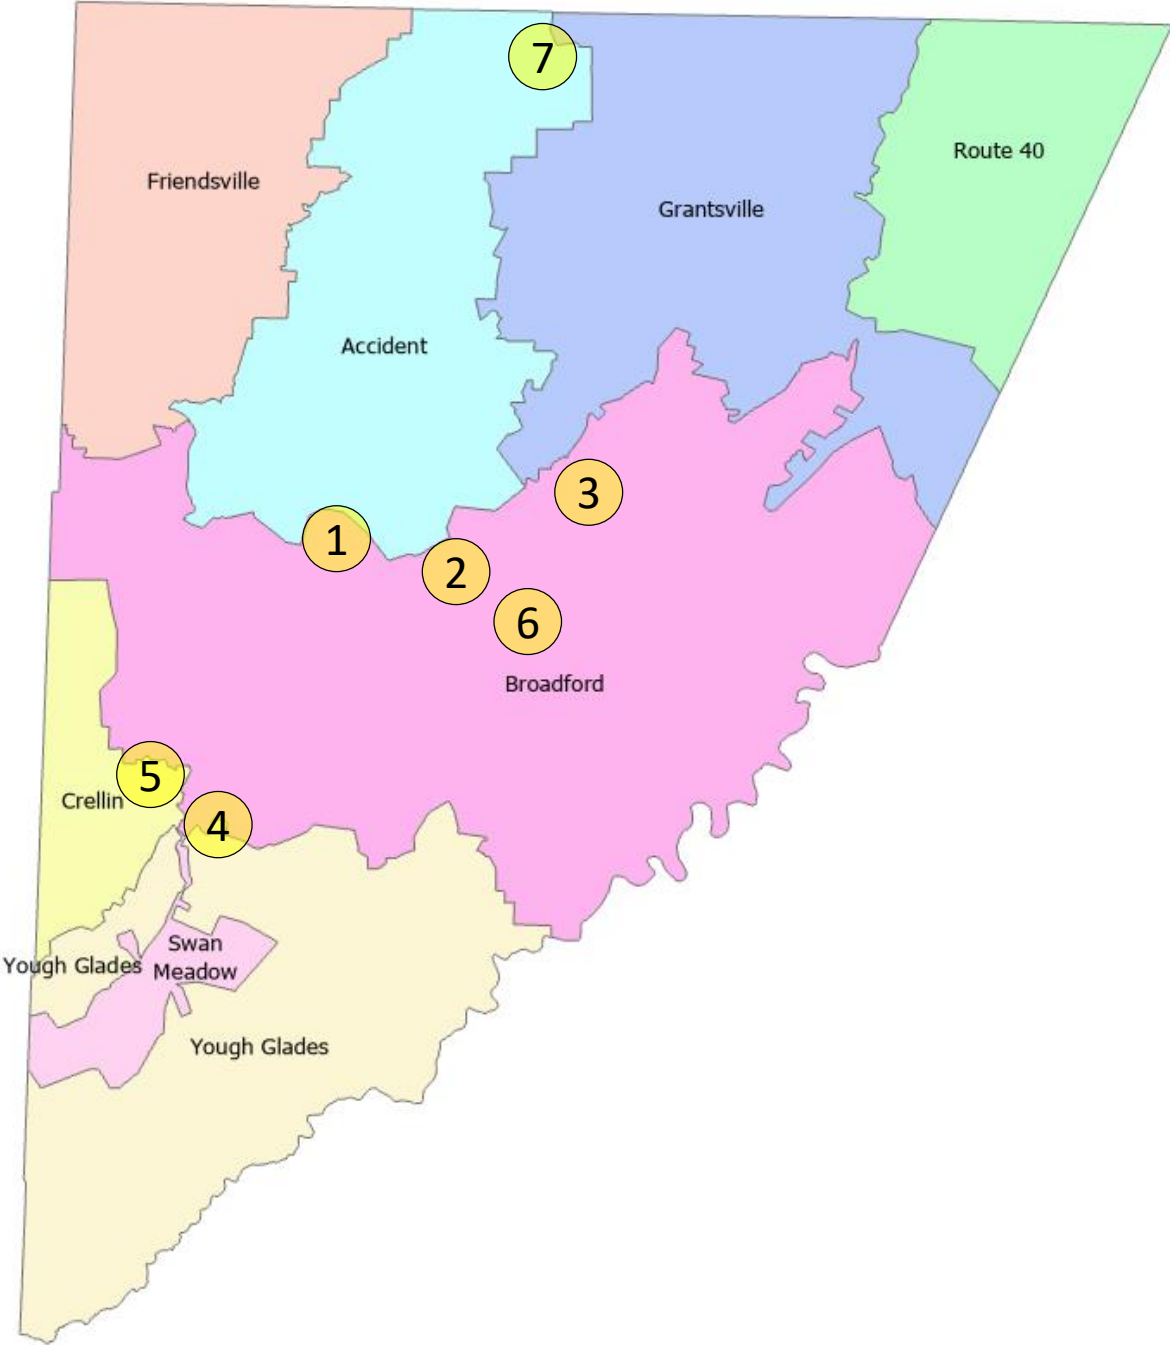

# Method

- Identify Planning Areas with logical transportation shifts
- Consider measures by percentage utilization

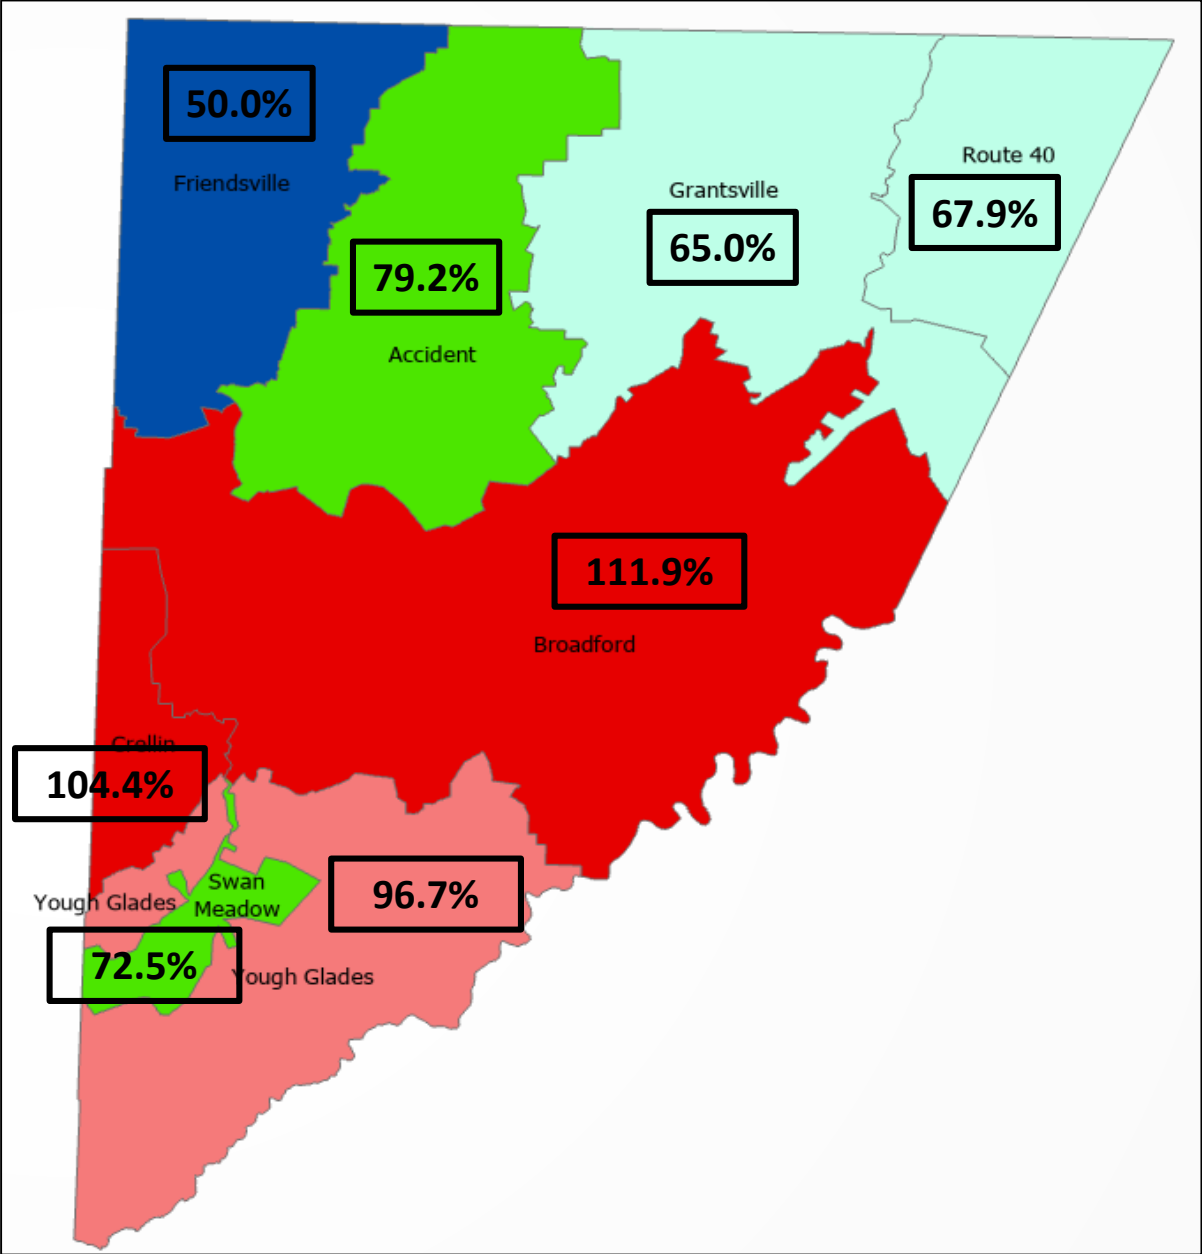

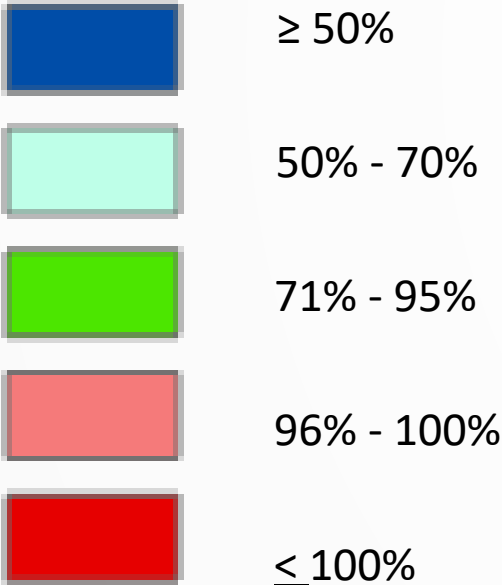

Condition	Status	Potential Measures
≤ 70% utilization	Under capacity	<ul style="list-style-type: none"><li>• Consider receiving from an overcrowded school</li><li>• Consider no change if transportation is unreasonable</li><li>• Assume no change for Swan Meadow</li></ul>
70-95%	Ideal	<ul style="list-style-type: none"><li>• No change unless a part of comprehensive plan</li></ul>
95-100%	Over capacity	<ul style="list-style-type: none"><li>• No change. Lower range acceptable if trend is stable</li><li>• Consider sending an area to an under utilized school</li></ul>
>100%	Over capacity	<ul style="list-style-type: none"><li>• Consider sending an area to an under utilized school</li></ul>
